Analytics

A few years back is facing around a 15% attrition rate for a couple of years.

The Data analytics shows the attritions happens for the single male in following department.

Department -Research and development & Sales

Education field –Life science

Business travel –Travel Rarely

In 4410 employees company , 711 employees has have resigned in which 453 are from research and development and rest in sales department.

The problem / Reason is the employees have not been promoted and they have got their promotion. The percentage of salary hike is 6 times low to these employees.

Recently or a couple of years back and the working employees have been working for more than a decade and max of 40 years .
